

Anand Jaiswal

AI Full stack developer

+91-8081143378 | anandjaiswalprofessional@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [Codolio](#)

EDUCATION

Bundelkhand Institute of Engineering and Technology — Jhansi, Uttar Pradesh

Bachelor of Technology in Electronics and Communication Engineering | Aug 2023 – May 2027

- YGPA: 8.27/10

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java

Web Technologies: React, Next.js, Express.js, Django, FastAPI, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools: Docker & Kubernetes, Git, GitHub, AWS, Postman, Cloudinary

Core Competencies: RESTful API Design, Authentication (NextAuth.js), Full-Stack Development, Containerization, ORM (Django ORM), Responsive Design

PROJECTS

Anonymous Messaging Platform | *Next.js, TypeScript, MongoDB Atlas, NextAuth.js, Docker* [\[GitHub\]](#) [\[Live Demo\]](#)

- Engineered full-stack web application enabling anonymous messaging for genuine feedback collection, supporting concurrent user sessions with secure NextAuth.js authentication.
- Containerized application stack using Docker and published to Docker Hub, achieving consistent deployment with sub-2-second page loads and 99.9% uptime on Vercel.

Restaurant Lookup System | *Django, PostgreSQL, Django ORM, JavaScript, Docker* [\[GitHub\]](#) [\[Live Demo\]](#)

- Developed comprehensive restaurant management platform with normalized database schema for cities, restaurants, menus, and ratings using Django ORM.
- Integrated role-based authentication separating restaurant owner and customer permissions, dockerized with Docker Compose and published to Docker Hub.

Full Stack Web | *FastAPI, React, SQLAlchemy, PostgreSQL, Docker, GitHub Actions* [\[GitHub\]](#)

- Built a production-ready full-stack template using FastAPI, React, SQLAlchemy, and PostgreSQL, with Docker containerization ensuring consistent environments across development and production.
- Implemented CI/CD pipeline via GitHub Actions with automatic HTTPS provisioning, enabling seamless automated deployments with zero manual certificate management.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- **Hackathon Success:** Runner-Up in college-level hackathon during Tech Fest (50+ teams); Selected for Smart India Hackathon 2024 at college level.
- **Coding Platforms:** Solved 550+ algorithmic problems across multiple platforms — CodeChef (2-star, 1463), Codeforces (1152), LeetCode (1548) — showcasing strong data structures and algorithms proficiency.

CERTIFICATIONS

- Oracle Certified AI Foundation Associate – Oracle (2024) [\[View Certificate\]](#)
- JavaScript (Intermediate) Certificate – HackerRank (2024) [\[View Certificate\]](#)
- AWS – Zero To Hero | Complete AWS Intermediate Course (2026) [\[View Certificate\]](#)
